

***“We serve you like Royalty with warm and personalized attention”***

***~Ann's Service Promise***

My clients are my friends who expect the best from me. They want their eyewear wardrobe to fit who they are, be unique and complimentary, and include the newest lenses which give them the best vision possible. At Ann's Eyewear Boutique, our clients expect and receive perfection: from the prescription to the completion of their eyewear. We make sure they not only see great but look great as well!

I travel once a year to international eyewear shows in Paris, Milan, or Tokyo. When attending these shows I seek out the newest technology and the best the world has to offer in eyewear. Our unique camera software takes pictures of people with a variety of frames so that they can see themselves from a distance. This perspective allows us to choose the frames that are right for them based on their face shape and natural coloring. We have advanced finishing equipment in our laboratory that allows us to make the highest precision eyewear possible and are one of the first ten offices in the nation to be chosen to have the new Visioffice machine installed in our boutique. Our capability to make each pair of glasses even more precise and customized has grown thanks to all of the amazing technology at our disposal.

I have spent many years perfecting this business for my clients. I want them to feel welcome the minute they walk through the door. Whether you'd like a Cafe latte, Turkish Apple Tea, homemade fudge, a place to sit and talk, an adjustment, or a new look, we are here to help you. We not only love our clients but we are specialists in what we do!

***Ann Rangen-Braga***

President of Ann's Eyewear Boutique

\*\*\* Don't be surprised when you see my two standard poodles, Baille and Cede, and Bridgette, my African Gray Parrott at the shop. I love animals and they come to work with me every day!
